Flow of Principal Investment, from Start-up to Expansion

- Gather new business proposals or areas to enter through M&A twice a year through our "NewBiz" event.
 - All professionals can participate, provided that one partner backs them up.
- If the idea is selected as part of NewBiz, its business potential will be verified through consumer interviews and other market research
 - There are always around 10 NewBiz ideas under consideration.
- Once the business potential is recognized, an investment memorandum (investment plan) is prepared to raise funds, with the aim of expanding the business as a portfolio of strategic investment areas.
- When its scalability is recognized, the business will be identified as a focus industry and additional investment is provided to support further business growth.
- Although we are not expected to exit in the short-term, if we determine that the scalability of the business is limited, we will sell the business to maximize the recovery of funds for investment in other new businesses.
